

Publication and Ethics Malpractice Statement

The International Conference on Advances in Materials, Mechanics, Mechatronics and Manufacturing (IC4M 2025) is committed to maintaining the highest standards of integrity in academic publishing. This statement outlines the ethical principles and standards that must be upheld by all participants in the publication process, including authors, reviewers, and editors.

Ethical Responsibilities of Authors

1. Authors must ensure that their submitted work is original, properly cited, and free from plagiarism.
2. Data must be presented honestly without fabrication, falsification, or inappropriate data manipulation.
3. The manuscript should not be submitted to more than one publication or conference at the same time.
4. All sources of funding and potential conflicts of interest must be disclosed.
5. Proper acknowledgment must be given to individuals and institutions that significantly contributed to the research.
6. All authors listed should have contributed significantly to the work and agree to its submission.

Ethical Responsibilities of Reviewers

1. Reviewers must provide objective, constructive, and timely feedback.
2. They must maintain confidentiality regarding the review process and not use any information obtained during the review for personal advantage.
3. Any potential conflicts of interest must be declared prior to accepting a review assignment.
4. Reviewers should alert the editorial team to any substantial similarity between the manuscript under review and other published work.

Ethical Responsibilities of Editors

1. Editors are responsible for ensuring a fair and transparent peer-review process.
2. They must evaluate manuscripts solely based on their academic merit, relevance, and originality.
3. Editors will not disclose any information about a manuscript to anyone other than the corresponding author, reviewers, and publishing staff.
4. Editors will take reasonable steps to identify and prevent publication misconduct and, if necessary, take corrective action including retraction or correction of articles.

Plagiarism Policy of IC4M

IC4M 2025 follows a strict anti-plagiarism policy. All submissions will be screened using plagiarism detection software. Manuscripts found to contain plagiarism, including self-plagiarism, will be rejected immediately.

Retraction and Corrections

In cases of proven ethical misconduct, such as plagiarism, data fabrication, or duplicate submission, the conference reserves the right to retract or remove papers from its proceedings. Authors may be asked to submit corrections if significant errors are identified post-publication.
